There are of course other reasons - legal and otherwise. In the Navy, it's all about the mission! We have a job to do - and we need each and every worker to do it! That means, the Navy needs to keep everyone healthy and able to continue to do the mission each and everyday!

This is the goal of the Navy Occupational Safety and Health Program.

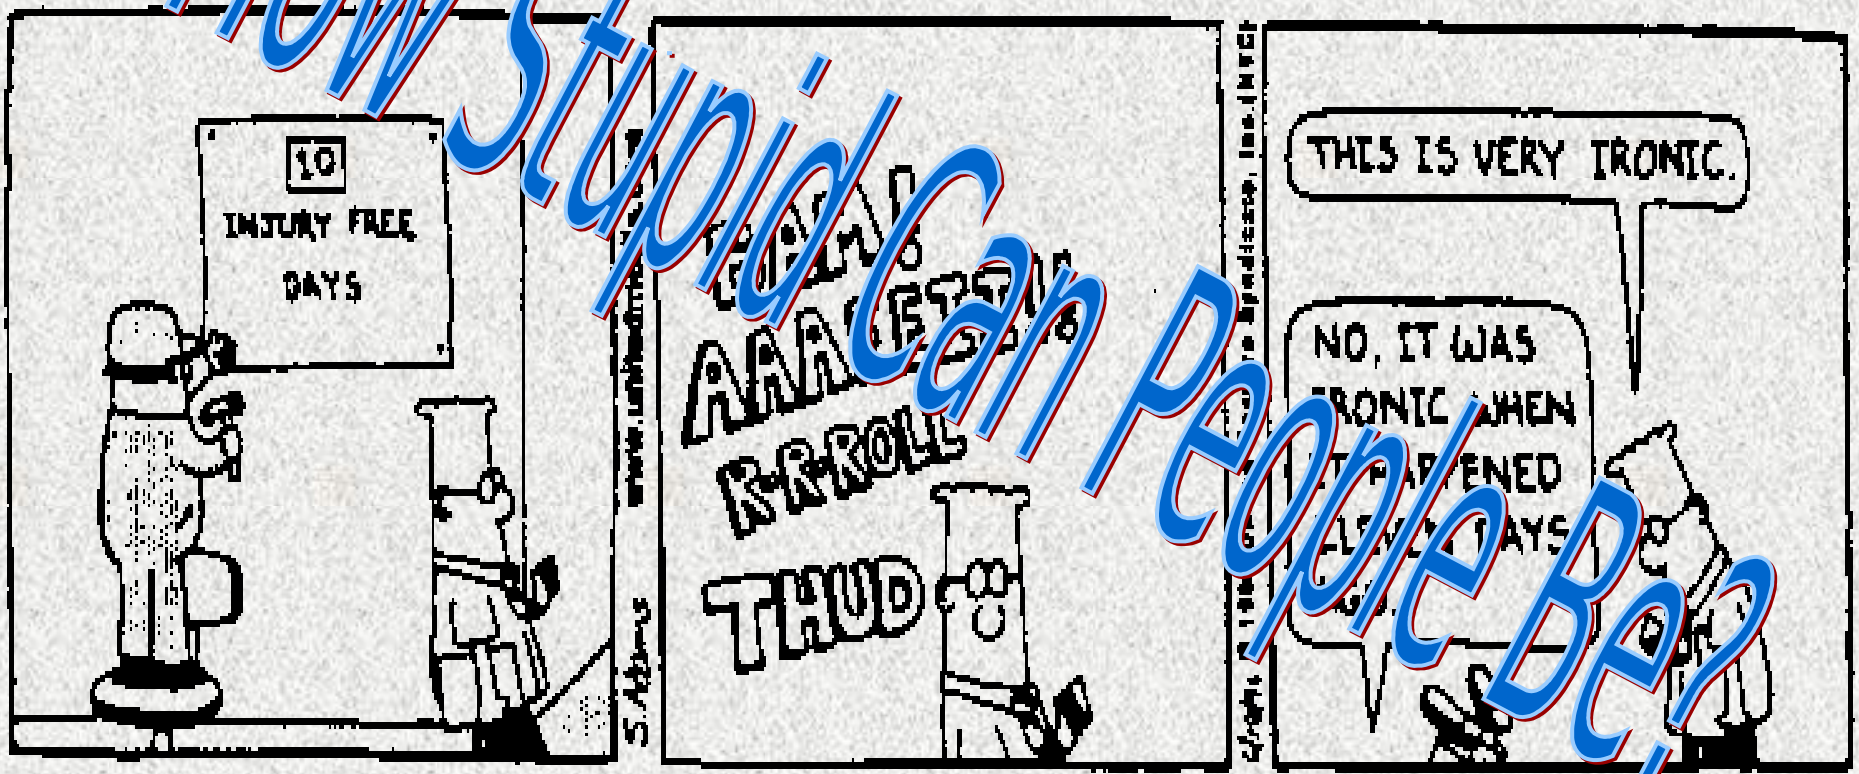
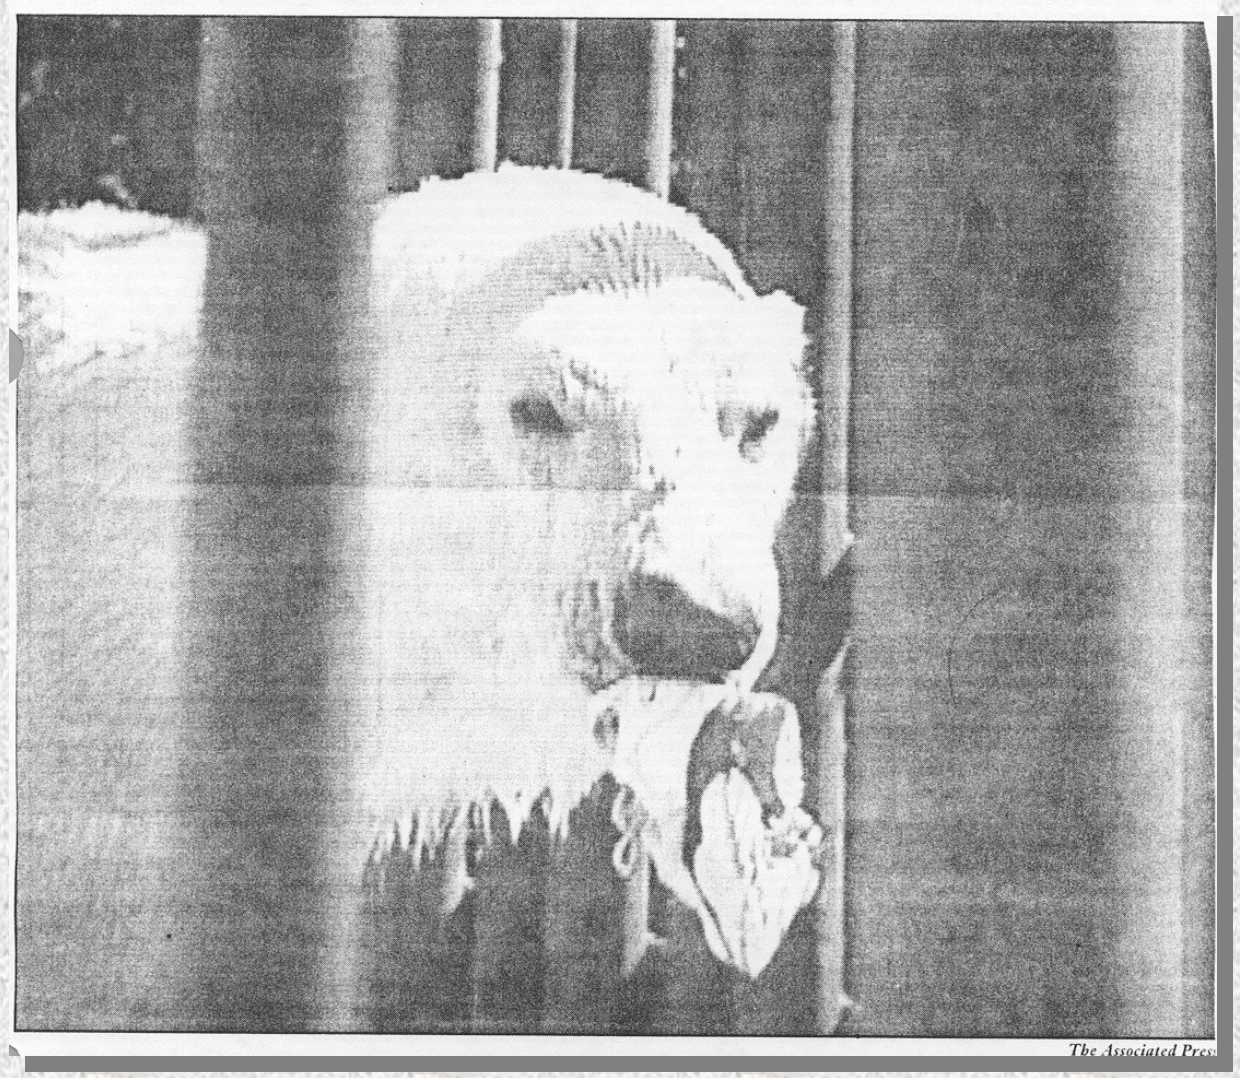
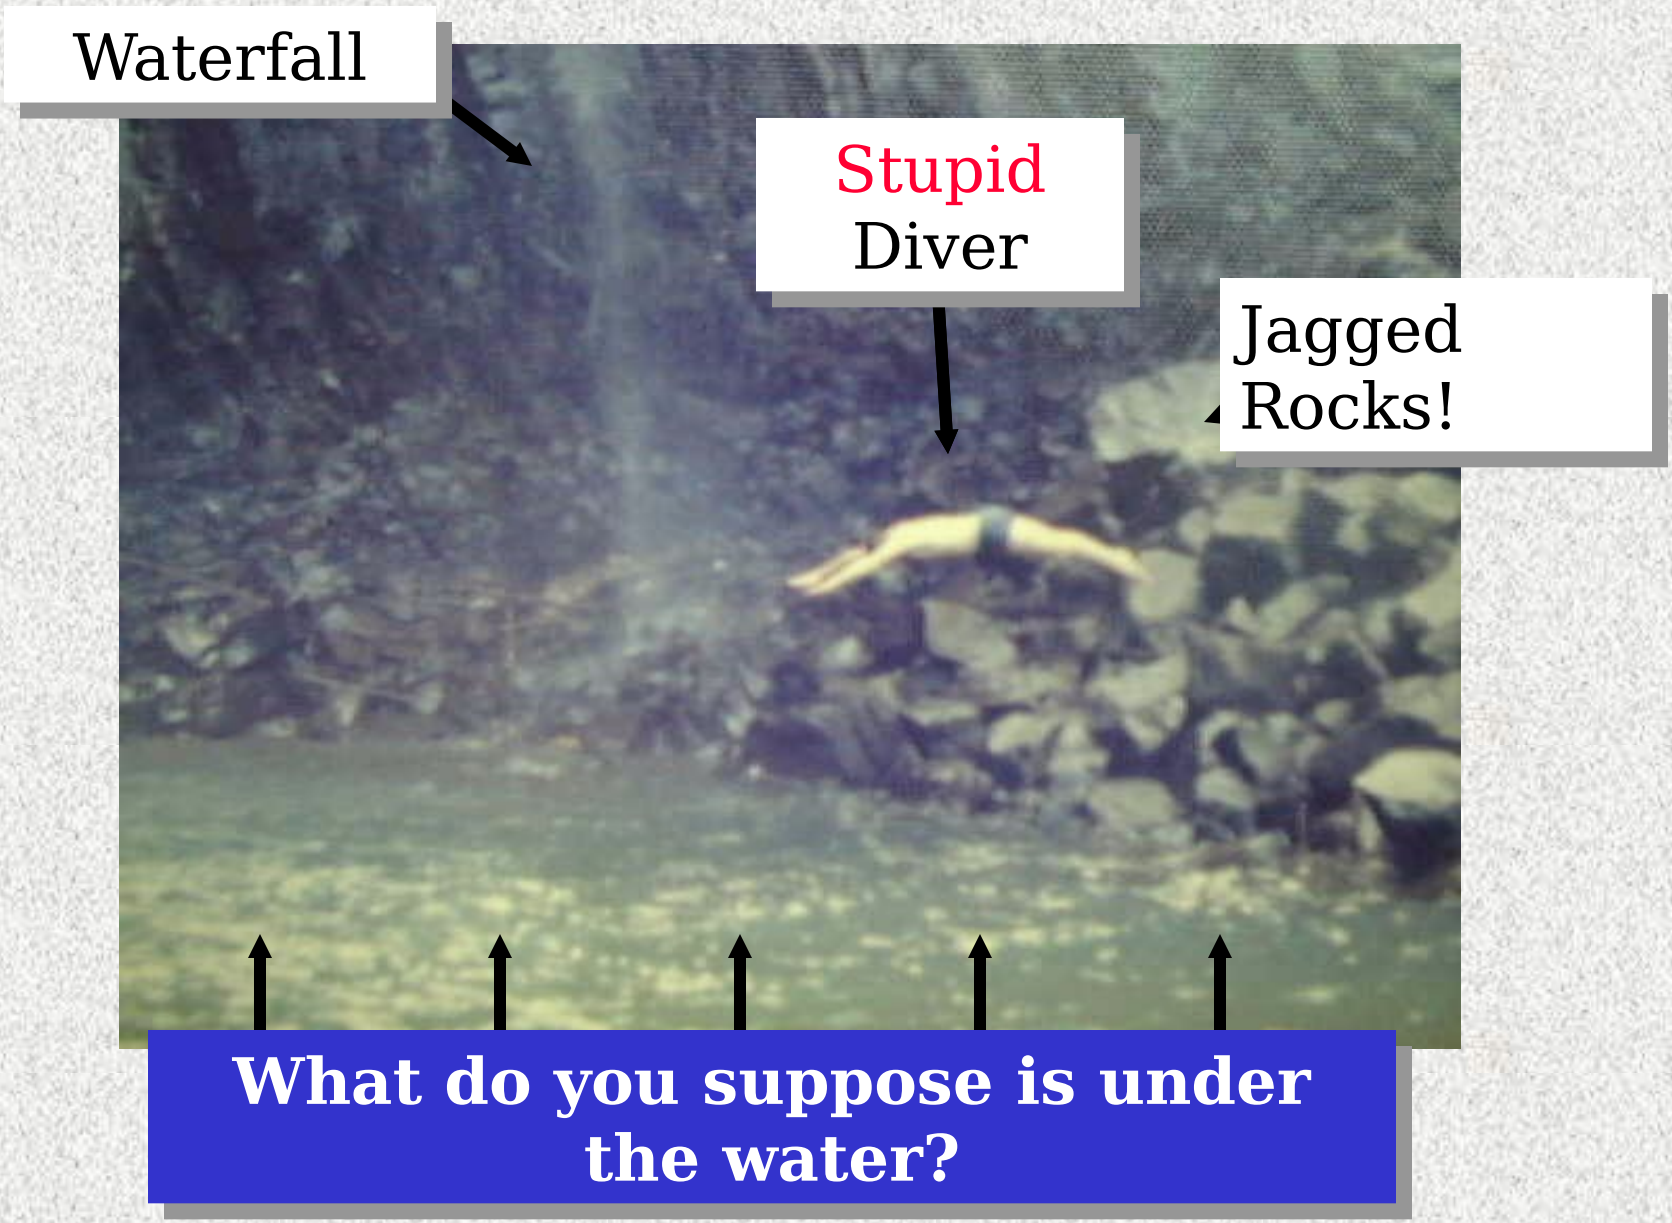
How Stupid Can People Be?



Binky, the Alaska Zoo's male polar bear, chews on a tennis show belonging to an Australian woman who was grabbed and mauled by the bear when she got too close to his cage. The 29-year-old woman **apparently ignored warning signs and climbed over a wooden fence and a steel safety railing** to get a close-up photograph of the bear. Rescued by other zoo visitors and zoo personnel, she was hospitalized and listed in stable condition with a broken leg and bite



Zoo officials don't expect action to be taken against the bear.



Waterfall
Stupid

Jagged
Rocks!
What do you suppose is under the water?

The following slide is neither an endorsement nor was I financially compensated for the inclusion of this photo. It’s use is for training purposes only.

DANGER

Why do people do unsafe things??

A - B - C

- ACTIVATOR

  Your spouse/significant other
- BEHAVIOR

  Put your clothes away
- CONSEQUENCE

  Satisfaction? You can find your clothes? Your spouse is happy?

CONSEQUENCE

- SOON <----------> LATE
- CERTAIN <----------> UNCERTAIN
- POSITIVE <----------> NEGATIVE

Driving over the speed limit.

+ Get where you're going faster.
+ It's a rush.
+ You're in control.
- Get pulled over by police/get ticket.
- Pay a heavy fine.
- **Get in an Accident/Hurt/Killed**

The more we look at safety as a positive consequence, the more we are apt to do things safely

Safety

is

a

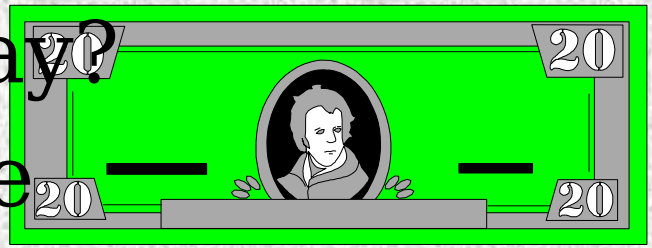
VALUE!

Safety is a PART of the job.

- When a job is done well, it’s done safely.
- You follow procedures, ‘cause it’s the right thing to do.
- When there’s pride in ownership (a job well done) you want to take care of #1 - YOU!
- When you work together as a team, you take care of your co-workers, too.

Safety is a PART of the job.

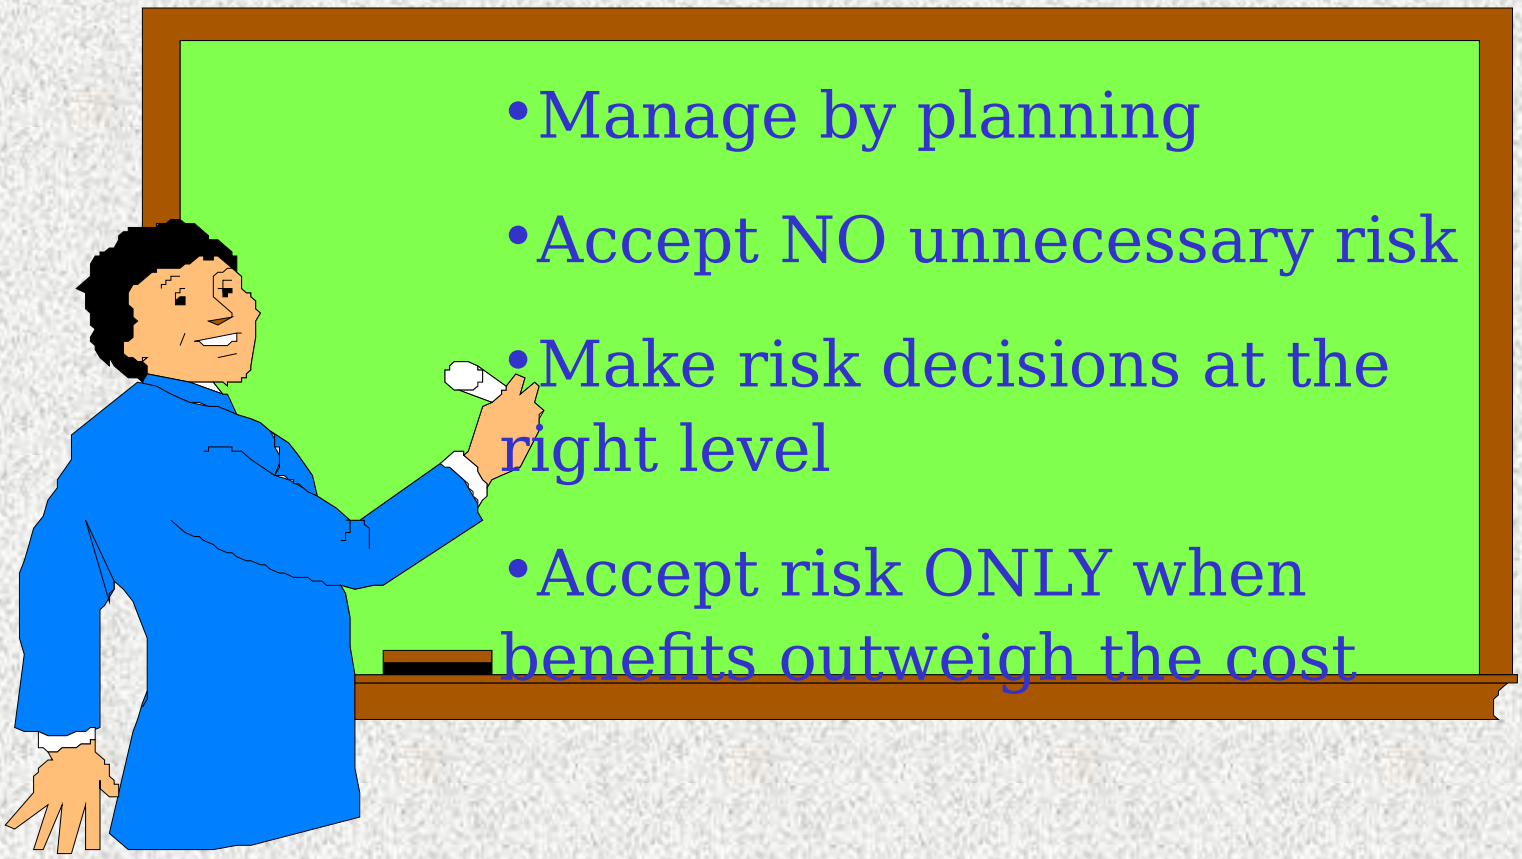
- Mishaps cost money - whose money is it anyway?
- Mishaps cost time
- Mishaps cause a decrease in productivity



Some feel they don’t have time for safety, but there always seems to be time to investigation a mishap

Risk Management
5 Steps

Risk Management
4 Rules



•Manage by planning
•Accept NO unnecessary risk
•Make risk decisions at the right level
•Accept risk ONLY when benefits outweigh the cost

What's Your Safety Attitude?

Before You Start, ASK....

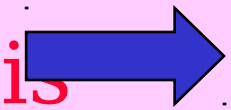
"What can go wrong here?"

"What do I need to do to prevent this from going wrong?"

"Is it worth it to go ahead now?"

THEN ASK - "WHY SHOULD I BE SAFE?"

I'll tell you my answer to this question...



Kyo, Watashi ga Anzen de aru Ichiban no RIYU desu!

L A S T L Y

- IF
- YOU
- DON’T
- KNOW

- A S K ! !

Thank You!
